BOOTCAMP

1- write a program to take a number in second and after start , show a timer (animation for timer is optional)

2- Make a form to take a text and number for position of message and after submit , show message in given position (class is optional)

```
1  // shows an element with the text "Hello" near the right-top of the window
2  showNotification({
3    top: 10, // 10px from the top of the window (by default 0px)
4    right: 10, // 10px from the right edge of the window (by default 0px)
5    html: "Hello!", // the HTML of notification
6    className: "welcome" // an additional class for the div (optional)
7  });
```

3- (This quest is optional for who dare to learn) :

a - Fetch data of 10 user from this URL :

 https://dummyjson.com/users

(Hint : Look Docs of this Url: https://dummyjson.com/docs/users)

b - make card for each user and show it in DOM
